Technical Skills

Programming Skills: Python, C Programming, Data Structures, Machine Learning, JAVA
Tools & Framework: Tableau, Docker, Portswigger, Kali linux
Other Skills: Data Analysis, Presentation Skills

Projects

HTTP Header Attack Using BURPSUITE:
- Created a HTTP header attack using Burpsuite penetration testing tool which is developed by Portswigger
- Through this software tool turned the http address of facebook into Instagram and made the attack complete
- With this used facebook but still the https address was still instagram

PHISHING Attack using KALI Linux:
- **Phishing attack basically a type of social engineering attack used to steal sensitive information from victims database.**
- **Through using Kali linux (A OS used for secure and cyber purposes) and with the help of git lab source code generated by Kasroudra created a program to steal information of login credentials of many websites from victims by providing him a link to login through it.**
- **It was success but it was approach and attack type of threat so 4 in 10 victims would do it others refuse which maded the attack go in vain.**
- **Still got the login credentials of Instagram, facebook, twitter, etc of friends**
- **Basically it was for education purpose**

Certifications

- **Python for Everybody.**
- **Cyber Security and Applied Ethical Hacking (via Infosys Springboard)**
- **Cyber Security and Hacker Tactics Awarness (via Infosys Spring board)**
